September 12, 2011

After completing a Web Design and Interactive Media degree with the Art Institute in 2012, I continued my education by continually remaining employed thru freelance work in various design disciplines.

Course highlights include: eLearning, Screen Design, Design and Typography, Web Scripting and Web Development.

Based on your description of the ideal candidate, I also offer:

- A solid foundation in management as I was a restaurant manager before I was in the Army and currently I run a team which is responsible for design decisions, XML and audio editing for the web.
- A proven ability to train individuals in various fields using a teaching method that is fun and is easily understood.
- Technical proficiency in MS Word, Audacity, Adobe Premier Pro, and common computer issues to include network related problems.

If you agree that my services would be valuable to your company, I would very much like to meet in person to learn more about your design needs. Please feel free to call me at (253) 709-5026 or email daniel@cre8vedesign.com.

Thank you for your time and review of the enclosed resume, and I look forward to speaking with you.

Sincerely yours,
Daniel Hughes
